

FAST RESCUE CRAFT KITS

The Jason's Cradle[®] FRC Kits are proven to aid in the safe and speedy recovery of man-overboard victims in the preferred horizontal position.

NAVIES WORLDWIDE CURRENTLY USE THE JASON'S CRADLE[®]

- Australia
- Belgium
- China
- Ireland
- Denmark
- Germany
- Netherlands
- United States of America
- United Kingdom
- Malaysia
- France

JASON'S CRADLE[®] QUITE SIMPLY WE SAVE LIVES...

They are currently in service globally with most Navies' and are considered a vital piece of safety equipment. The kits are SOLAS Approved and guaranteed for 3 years. SOLAS NAVIES WORLDWIDE CURRENTLY USE THE JASON'S CRADLE[®]:

- The FRC kit consists of a Jason's Cradle[®] with stowage bag and a fixing kit that enables the Cradle to be deployed on both the port and starboard side as required.
- Deployment of the Cradle forms a non-collapsible scoop.
- The FRC approaches the casualty slowly, keeping them on the windward side and the casualty is guided into the Cradle headfirst.
- A strop is pulled to close the loop.
- A co-ordinated and methodical lift takes place and 'rolling' him over the tube into the rescue craft in the medically preferred horizontal position retrieves the casualty.
- Even with very heavy bodies the lift takes just a few seconds due to the Cradle's 2 to 1 mechanical advantage.
