

RECREATIONAL WORKBOOK

MUSTANG SURVIVAL | 2026

WHO IS MUSTANG SURVIVAL?

For nearly sixty years, our passion for innovation and saving lives has driven us. We created the world’s first floater coat in 1967 and continue to craft marine gear that pushes the boundaries of science, engineering and what is possible for professional and recreation users.

At our Waterlife Studio in Vancouver, BC, we test human physiology and material properties in our science lab, trial product concepts in our prototyping shop, evaluate new ideas in our testing pool, and construct our marine gear in our manufacturing centre. Within these

walls, our progressive and talented engineers and designers create customized products for the wide-ranging variety of customers we support.

Poised between the banks of the Fraser River and the Salish Sea, our headquarters allows us to test what we build in real time, in real-world conditions. Our production takes place in our North American factories next to the Waterlife Studio in Vancouver and in Jacksonville, Florida, as well as overseas. We ensure each product meets the highest standard of quality and safety.

We remain committed to pushing the boundaries and redefining the standards of marine gear design and construction. Looking ahead to 2026, we’re keeping the momentum going with exciting updates to our Rev kids and young adult flotation line, while also expanding our Taku collection with a sleek black colourway, perfect for lodges and marinas.

We protect life on the water, and everything we do upholds this mission.

USER GROUPS

Mustang Survival focuses on four categories of users, each with their own needs, motivations, and expectations.

RECREATION

People who explore and play on the water in all types of weather, from weekenders to expeditioners.

PUBLIC SAFETY

The people who keep our waterways, communities, and countries safe and respond when lives need saving.

INDUSTRIAL

Workers who expose themselves to the—often extreme—elements and need the best gear possible to get the job done and get home safely.

MILITARY + GOVERNMENT

These groups and individuals are responsible for our national safety, often at the front lines around the world.

PRODUCT ARCHITECTURE

Selecting the right gear for an activity can be challenging and overwhelming. When designing products our engineers and designers consider both the primary activity and the environments where the activities take place. The four main environments we consider are:

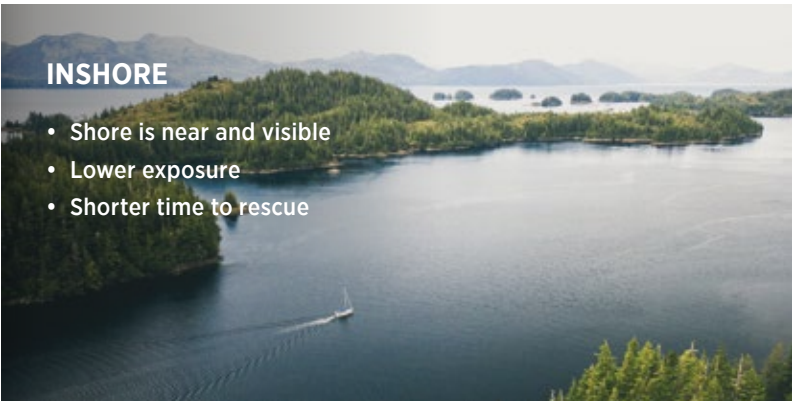

Inshore | Coastal | Offshore | Open Ocean

Each of these environments are associated with different levels of risk and needs impacted by weather and water conditions and rescue possibilities.

When considering intended use within an environment, our designers can create products (or gear) with the right characteristics:

Fit | Features | Materials | Construction

for the associated activity enabling the best possible experiences on the water.

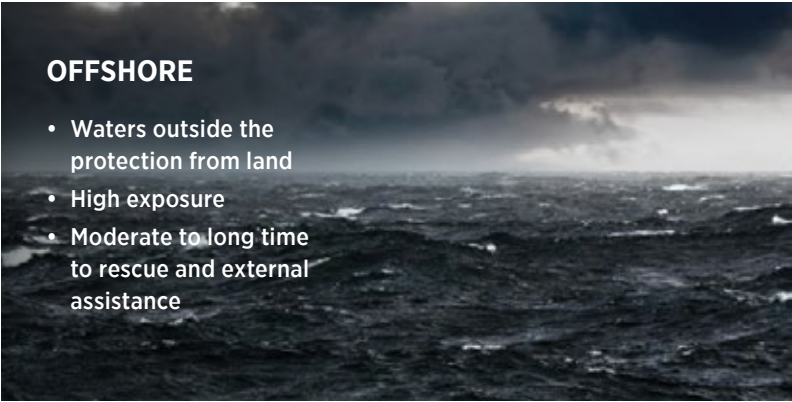

INSHORE

- Shore is near and visible
- Lower exposure
- Shorter time to rescue

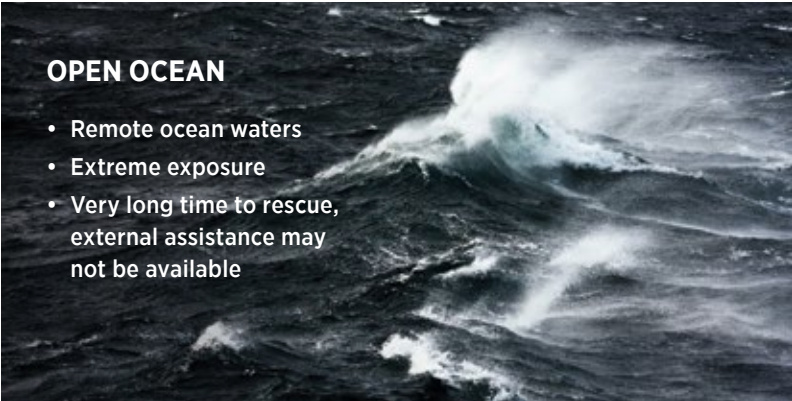

COASTAL

- Farther from shore but still visible
- Moderate exposure
- Moderate time to rescue

OFFSHORE

- Waters outside the protection from land
- High exposure
- Moderate to long time to rescue and external assistance

OPEN OCEAN

- Remote ocean waters
- Extreme exposure
- Very long time to rescue, external assistance may not be available

FLOTATION TECHNOLOGY

ADAPT TECHNOLOGY

Stands for ADvanced Airway Protection & Turning—Technology incorporates four main features: bladder lobes shaped to turn the wearer face up effectively, baffle barriers near the chin to dissipate incoming waves to the face, a wide head pillow to provide greater stability in the faceup position, and a contoured design for improved in-water comfort and stability.

- Head Pillow**
Wide platform provides ultimate support in all conditions
- Spray Barrier**
Improves airway protection
- Bladder Contouring**
Provides strong turning performance
- Movement**
Specifically designed to increase range of motion in water

GAIA™ FOAM

Gaia™ foam is a nitrile butadiene rubber (NBR) based closed-cell foam free from PVCs, CFCs, phthalates, and halogens (fluorine, chlorine, bromine, iodine, astatine.) At Mustang Survival, we’ve chosen Gaia™ foam as it provides the same strong buoyancy, exceptional in-water performance, and comfortable suppleness our PFDs are known for while removing PVC-based foams from our products and reducing our environmental impact during production.

HYDROSTATIC INFLATOR TECHNOLOGY (HIT)

Hydrostatic Inflator Technology (HIT) inflates automatically under pressure when submerged in 4 inches or more of water—never by rain, spray, or humidity. Built for high-risk situations, these inflators rely on hydrostatic pressure, requiring more depth and time to activate than other automatic inflators. This ensures inflation only when truly needed, delivering reliable protection when it matters most.

MEMBRANE INFLATABLE TECHNOLOGY (MIT)

Membrane Inflatable Technology (MIT) replaces traditional PFD bladders with a lighter, more comfortable, and flexible design. When not inflated, the MIT membrane is protected by a durable nylon face fabric. Once deployed, each MIT PFD features high-visibility, contrasting fabric for increased safety in rescue situations. The MIT design allows for simple re-pack after inflation.

OPEN OCEAN INFLATABLES

Open ocean safety requires PFDs with purpose-built features, high buoyancy, and additional safety equipment—like sprayhoods and water-activated lights—standardly included. These inflatables meet the demands of delayed rescue and large seastates with designs that maximize airway protection and improve the chances of turning the wearer face-up.

OFFSHORE INFLATABLES

Venturing beyond the coast raises the risk of delayed rescue and prolonged exposure. Offshore inflatable flotation provides extra safety features, enhanced airway protection, and a higher chance of turning unconscious users face-up.

ISO

ATLAS 190 DLX HYDROSTATIC INFLATABLE LIFE JACKET

Model#	MD3195E1	
Approval	ISO 12402-3 (150N), ISO 12402-8 (SPRAYHOOD AND LIGHT), ISO 12401 (DECK HARNESS)	
Size	UNIVERSAL ADULT	RE-ARM KIT N (#MA3190)

A cutting-edge choice for offshore sailing, cruising, and boating, the Atlas 190 DLX Life Jacket is engineered with ADAPT Technology. This vest boasts an ergonomic design for all-day comfort and features such as an integrated sprayhood and SOLAS-approved water-activated light for enhanced visibility during emergencies.

- Hammar’s MA1 inflator featuring Hydrostatic Inflation Technology (HIT) is maintenance-free for 5 years and significantly reduces the chances of unintentional inflation
- ADAPT technology incorporates bladder contouring that provides strong turning performance without hindering self-rescue or boarding of rescue crafts
- Low-profile tether point allows users to attach to jack lines (tether line not included)
- Integrated leg strap is detachable
- Lightweight anodized aluminum hardware provides durability and security
- Integrated sprayhood prevents secondary drowning
- Water-activated light increases on the water visibility
- Room for AIS and PLBs
- Ergonomically shaped to sit off the neck and provide all-day comfort
- 188N / 42 lbs of buoyancy

ELITE 190 INFLATABLE PFD

Model#	MD3170	
Approval	HARMONIZED LEVEL 70 (USCG /TC APPROVED)	
Size	UNIVERSAL ADULT	RE-ARM KIT O (#MA3160)

This PFD is the perfect companion for every adventure on the water—from coastal sailing to boating and fishing offshore. The Elite 190 Inflatable PFD uses the same groundbreaking bladder design as the Atlas 190 Life Jacket line, combining a versatile fit for all-day comfort and unsurpassed in-water safety. With AIS and PLB compatibility, advanced safety features, and Hammar’s Hydrostatic Inflation Technology (HIT), this vest offers secure, worry-free wear on the water.

- Hammar’s MA1 inflator featuring Hydrostatic Inflation Technology (HIT) is maintenance-free for 5 years and significantly reduces the chances of unintentional inflation
- ADAPT technology incorporates bladder contouring that provides strong turning performance without hindering self-rescue or boarding of rescue crafts
- Engine kill switch loop
- Room for AIS/PLB storage
- Built-in compatibility for optional leg straps (MA3032), sprayhood (MA3150), and light (MA7100)
- Ergonomically shaped to sit off the neck and provide all-day comfort
- 188N / 42 lbs of buoyancy

13 BLACK

123 RED-BLACK

INFLATED

COASTAL INFLATABLES

PFDs for coastal waters—far from shore yet within sight of land. These inflatables provide safety features for moderate exposure risks and possible rescue delays in an emergency.

INSHORE INFLATABLES

Inflatable and dual-flotation PFDs offer safety solutions for near-shore and inland waters, where exposure is lower and rescue times are shorter.

ELITE 120 INFLATABLE PFD

Model#	MD5170	
Approval	HARMONIZED LEVEL 70 (USCG /TC APPROVED)	
Size	UNIVERSAL ADULT	RE-ARM KIT A (#MA5183)

The Elite 120, an updated version of our Elite 28 with the same 28 lb (120N) buoyancy, perfect for anglers, sailors, and boaters seeking comfort on inshore to coastal adventures. Featuring our exclusive ADAPT Technology, it ensures top-notch performance and safety, providing peace of mind on the water.

- Hammar’s MA1 inflator featuring Hydrostatic Inflation Technology (HIT) is maintenance-free for 5 years and significantly reduces the chances of unintentional inflation
- Engine kill switch loop
- Mesh back for comfort and breathability
- Ergonomic chassis and a low-profile design that sits off the neck provides all-day comfort
- 120N / 28 lbs of buoyancy

MIT 100 CONVERTIBLE A/M INFLATABLE PFD

Model#	USA MD2030	CAN MD2040
Approval	USCG - RECREATIONAL TYPE V (TYPE III PERFORMANCE) / COMMERCIAL TYPE V	TC APPROVED (TYPE III PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT L (MODEL #MA2030)

This versatile front entry inflatable PFD allows users to convert between automatic and manual inflation modes.

- Exclusive Membrane Inflatable Technology™ creates a lightweight and flexible fit
- High tenacity nylon face fabric is supple and durable
- 1-fold design is easy to repack
- Indicator window makes inflator inspection simple and easy
- Convert between automatic and manual-only inflation modes by simply swapping inflator caps (included)
- Will self-right most wearers (face-up) once inflated
- 28 lbs of buoyancy when inflated

MIT 70 AUTOMATIC INFLATABLE PFD

Model#	MD4042	
Approval	HARMONIZED LEVEL 70 (USCG /TC APPROVED)	
Size	UNIVERSAL ADULT	RE-ARM KIT K (MODEL #MA4041)

This front entry automatic inflatable PFD has the lowest profile of its kind approved in North America, making it the perfect addition for all your inshore explorations.

- Exclusive Membrane Inflatable Technology (MIT) creates a lightweight, flexible fit
- Indicator window makes inflator inspection simple and easy
- Automatically inflates upon water immersion
- Manual inflation handle allows you to inflate the vest at any time
- Contrasting fabric is highly visible when inflated for increased safety in rescue scenarios
- 15.7 lbs of buoyancy when inflated

KHIMERA DUAL FLOTATION PFD

Model#	MD7183	
Approval	HARMONIZED LEVEL 70 (USCG /TC APPROVED)	
Size	UNIVERSAL ADULT	RE-ARM KIT G (MODEL #MA7116)

This over-the-head entry PFD offers a dual flotation system that blends the security of foam with the slim profile of an inflatable.

- Lightweight and low profile design enhances mobility and comfort and eases re-entry into your boat from the water
- Adjustable shoulder and waist straps create a close-to-body fit
- Front storage pocket and slot hold extra CO2 cylinder (extra cylinder not included)
- Front shoulder attachment points for a knife, strobe, or other gear
- Reflective shoulder patches improve visibility in low light conditions
- Provides 20.5 LBS of dual buoyancy when inflated (7.5 LBS foam buoyancy and 13 LBS buoyancy when the cell is inflated)

ESSENTIALIST INFLATABLE BELT PACK

Model#	MD3800	
Approval	HARMONIZED LEVEL 70 (USCG /TC APPROVED)	
Size	UNIVERSAL ADULT	RE-ARM KIT J (MODEL #MA3070)

This inflatable belt pack offers 16.9 lbs (75N) of buoyancy and carries your essentials for any inshore adventure.

- 3D mesh liner provides comfort
- Manual inflation cord allows you to inflate the vest at any time
- Two zippered pockets and a mesh pocket with key clip provide storage for essentials
- Provides 16.9 LBS (75N) of buoyancy when inflated

MINIMALIST INFLATABLE BELT PACK

Model#	MD3070	
Approval	HARMONIZED LEVEL 70 (USCG /TC APPROVED)	
Size	UNIVERSAL ADULT	RE-ARM KIT J (MODEL #MA3070)

This inflatable belt pack offers a discrete and minimal design for inshore paddles with friends or for skilled swimmers who are looking for a little extra safety support.

- Lightweight ergonomic fit
- Inflates via manual inflation cord
- Minimalist design stays out of the way until activated
- Molle webbing for securing essentials
- Provides 16.9 LBS (75N) of buoyancy when inflated

ISO

PODIUM 50 BUOYANCY AID

Model#	MV5530E1
Approval	ISO LEVEL 50 12402-5
Size	JR, S, M, L, XL

This low profile foam vest maximizes agility for ultimate performance, whether paddling or sailing.

- Offset front entry zip allows for convenience of donning and doffing while increasing pocket size
- PVC free Gaia® Foam
- Front zipper pocket for quick access
- Mesh liner provides breathability for high output activities
- Ergonomic shape and shorter cut provides optimal range of motion for paddling or sailing
- Slot pocket ideal for radio clip or knife
- Streamlined design with no exposed webbing or adjuster tabs to reduce catch points

Harmonized

TRIDENT FOAM VEST

Model#	MV716002
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	S/M, L/XL

This versatile and lightweight front entry foam vest includes two large zippered mesh pockets for storage and offers six adjustment points.

- Z-Strap cinch system for a comfortable and secure fit
- 200D nylon shell is soft and durable
- PVC free Gaia® Foam (MV716002 only)
- Padded adjustable neoprene shoulders create all-day comfort
- Daisy chain attachments on the back secure equipment
- Large mesh pockets with a key clip keep personal items handy
- Reflective trim on the front, back, and shoulders
- Tethered signal whistle for emergencies

WOMEN'S SPECIFIC

Harmonized

WOMEN’S DESTINY FOAM VEST

Model#	MV705002
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	S/M, L/XL

This women’s specific front entry life vest, designed for paddling and sailing, includes the supportive Adjust-a-Bust system and large mesh pockets for organizing gear.

- 200D nylon shell is soft and durable
- PVC free Gaia® Foam (MV705002 only)
- Women-specific fit has six points of adjustment
- Adjust-a-Bust fit system provides support and prevents riding-up
- Padded adjustable neoprene shoulders provide all-day comfort
- Large zippered mesh pockets with a key clip keep personal items safe
- Reflective trim on the front, back, and shoulders
- Tethered signal whistle for emergencies

Harmonized

VIBE HARMONIZED FOAM PULL OVER

Model#	MV706002
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	S/M, L/XL

This low-profile pull-over foam life vest features a minimalist open-sided design to allow exceptional mobility and ventilation for sailing, SUPing, or whitewater paddling.

- Z-Strap cinch system for a comfortable and secure fit
- 200D nylon shell is soft and durable
- PVC free Gaia® Foam (MV706002 only)
- Padded adjustable neoprene shoulders provide all-day comfort
- Daisy chain attachments on the back secure equipment
- Back loops and attachment point for a tow or SUP Leash Release Belt
- A large top-entry mesh pocket with a key clip keeps personal items handy

Harmonized

TOPWATER FOAM VEST

Model#	MV411202
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	UNIVERSAL

This premium front entry PFD offers a universal size with plenty of adjustment points to customize the fit while lots of storage options and attachment points keep your gear handy.

- 210/420D ripstop nylon shell is highly durable
- Drop down tool bridge for lure setup
- Plyer holder with tether keeps tools secure
- Lash-tab on the shoulder to attach your radio or knife
- Adjustable shoulder and side buckles to accommodate a highly universal fit
- Tether point for engine kill switch cord

JAVA FOAM VEST

Model#	MV711302/ MV7113
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	XS/S, M/L, XL/XXL

This front entry foam vest is designed to accommodate longer torsos comfortably. Durable 210/420D ripstop nylon construction provides exceptional durability.

- 210/420D ripstop nylon shell is highly durable
- PVC free Gaia® Foam (MV711302 only)
- Six points of adjustment offer a customized fit
- Neoprene padded adjustable shoulders have strap end garages
- Two large zippered cargo pockets have mesh drainage
- Loops on the back secure gear
- Lash tab attachment for a knife or other items
- Specific loops fasten to sunglasses
- Reflective trim on the front and back enhances visibility
- Tethered signal whistle for emergencies

Harmonized

SOLARIS FOAM VEST

Model#	MV807002
Approval	HARMONIZED LEVEL 70 (USCG/TC APPROVED)
Size	XS/S, M/L, XL/XXL

This classic high-back front entry foam vest is designed to clear most kayak seatbacks. The mesh panels are incredibly breathable, and fleece-lined pockets warm you up during rest breaks.

- 200D nylon shell is soft and durable
- PVC free Gaia® Foam (MV807002 only)
- Mesh high-back design increases breathability and clears seatbacks
- Adjustable shoulder straps offer a customized fit
- Two large zippered cargo pockets have mesh drainage
- Loops on back secure gear
- Reflective trim enhances visibility in low light conditions
- Tethered signal whistle for emergencies

DIVA DELIGHT NEOPRENE PFD

Model#	MV1285
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	XS, S, M, L, XL

This front-entry PFD is constructed with comfortable and flexible high-grade neoprene and cut specifically for women.

- Cut and sized specifically for women
- Airsoft foam front for extra comfort around collar
- High-grade neoprene creates a soft, comfortable fit
- Large armholes enhance mobility
- Split tail reduces ride-up
- Tone-on-tone geometric artwork

NYLON WATER SPORT FOAM VEST

Model#	MV127302
Approval	TC MARINE - CAN/CGSB 65.11
Size	S, M, L, XL, XXL, XXXL

This front-entry multi-use foam PFD is engineered for cross-functional inshore marine activities.

- Airsoft foam front for extra comfort around collar
- PVC Free Gaia Foam
- Large armholes enhance mobility

ADULT UNIVERSAL FIT FOAM PFD

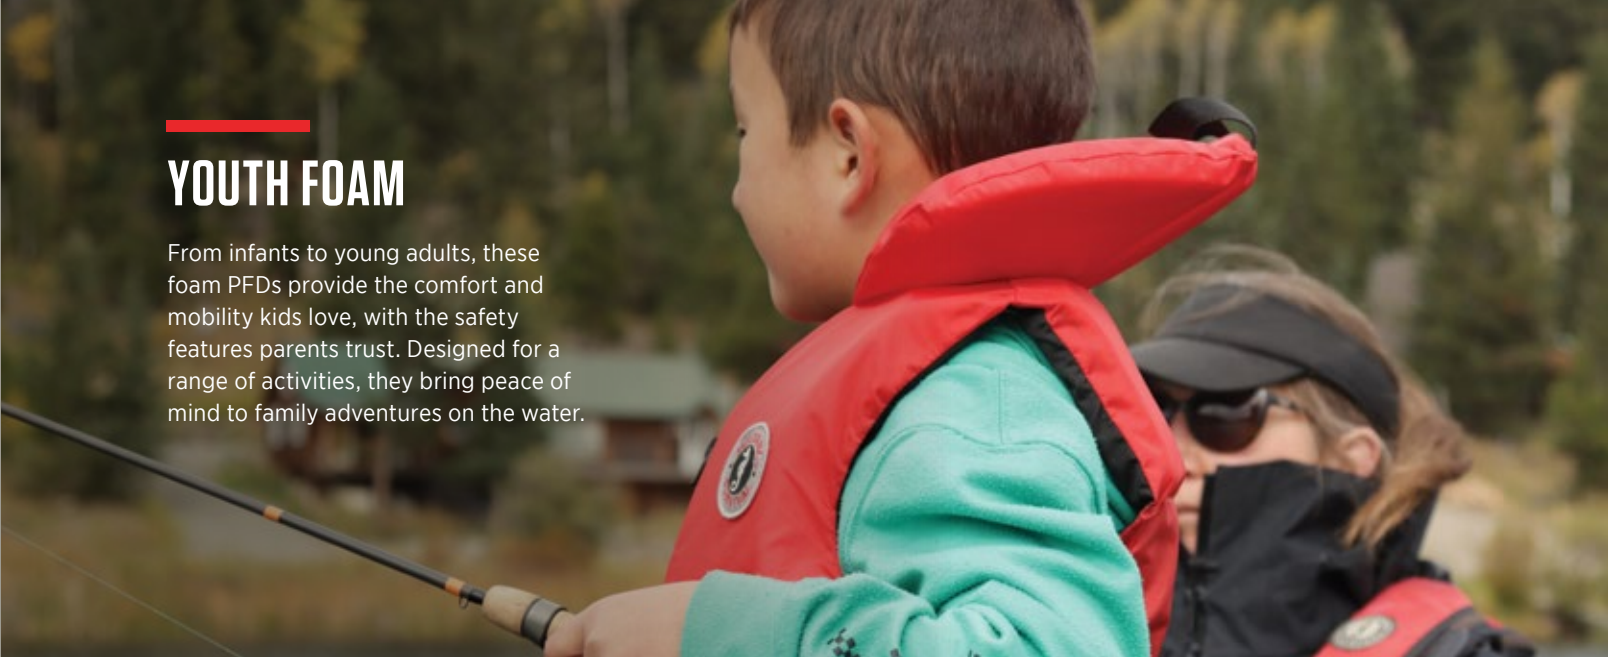

Model#	MV3005
Approval	TC MARINE - CAN/CGSB 65.11
Size	UNIVERSAL

This front-entry PFD offers a functional and economical industrial design in a universal size vest.

- Large armholes enhance mobility
- PVC free foam
- Three belts adjust to create a customized fit

YOUTH FOAM

From infants to young adults, these foam PFDs provide the comfort and mobility kids love, with the safety features parents trust. Designed for a range of activities, they bring peace of mind to family adventures on the water.

REDESIGNED  Harmonized

YOUNG ADULT REV FOAM VEST

Model#	MV3601
Approval	HARMONIZED LEVEL 70 (USCG / TC APPROVED)
Size	88-110 LBS (40-50 KG)

Uniquely segmented interior panels provide a superior fit for youth with a 28-32" chest range, offering better comfort and security than a small adult vest. The Young Adult Rev Foam Vest is now also PFAS-free.

- PFAS-free
- Segmented foam fits young adults better than a size small adult vest
- Grab loop for assisted rescue
- Towable and personal watercraft (PWC) rated

BAILER THROW BAG - 50FT

Model#	MRD500
Size	UNIVERSAL

With reflective details and a built-in bailer, this compact and aerodynamic throw bag is a necessity in any boat. Ready to toss to a swimmer, the 0.25in / 0.635cm wide rope is 50ft / 15.24m long with a tensile strength of 1,200 lbs.

- 50ft / 15.24m of essential 0.25in / 0.635cm width safety rope with 1,200lbs of tensile strength goes the distance
- Mesh panel for quick drying
- Flotation design won't sink
- Reflective details for high visibility
- Doubles as a convenient bailer

INFLATABLE PFD BELT EXTENDER (1.5 inch WIDTH)

Model#	MA7637
Size	UNIVERSAL

Compatible with 1.5in / 3.81cm webbing inflatable PFDs, this belt extender increases the waist belt size by 12in / 30.48cm.

- The Inflatable PFD Belt Extender increases the circumference of compatible PFDs
- Fits inflatable PFDs with 1.5in / 3.81cm webbing
- Compatible with PFD models MIT 100, MIT 70, HIT, Pilot 38, Elite 28, and discontinued models including MD3183, MD3153, MD3181, MD5183, and MD5153
- Not compatible with PFD models that have 2in / 5.08cm webbing (including older models of MD3052, MD3054, MD3082 and MD3084 and any model with the lot number beginning with a W)

INFLATABLE PFD BELT EXTENDER (2 inch WIDTH)

Model#	MA7632
Size	UNIVERSAL

Compatible with 2in / 5.08cm webbing inflatable PFDs, this belt extender increases the waist belt size by 12in / 30.48cm.

- The Inflatable PFD Belt Extender increases the circumference of compatible PFDs
- Fits inflatable PFDs with 2in / 5.08cm webbing
- Compatible with industrial MIT 100 vests (MD 2016 T1 and MD2017 T1), discontinued models of MIT 100 inflatable PFDs (MD2014, MD201402, MD2015, MD201502, MD2016, MD201602, MD2017, and MD201702)
- Not compatible with inflatable PFD models that have 1.5in / 3.81cm or 1in / 2.54cm webbing

SAILING LEG STRAP ACCESSORY

Model#	MA3032
Size	UNIVERSAL

This leg strap set provides extra safety by preventing PFDs from riding up while in the water.

- This Sailing Leg Strap attaches to inflatable PFDs to create a more secure fit
- Fits Mustang Survival PFDs with 1.5in / 3.81cm or 1in / 2.54cm webbing
- Attaches to PFD waist belt webbing
- Prevents the PFD from riding up

SUP LEASH RELEASE BELT

Model# MALRB2
Size S/M, L/XL

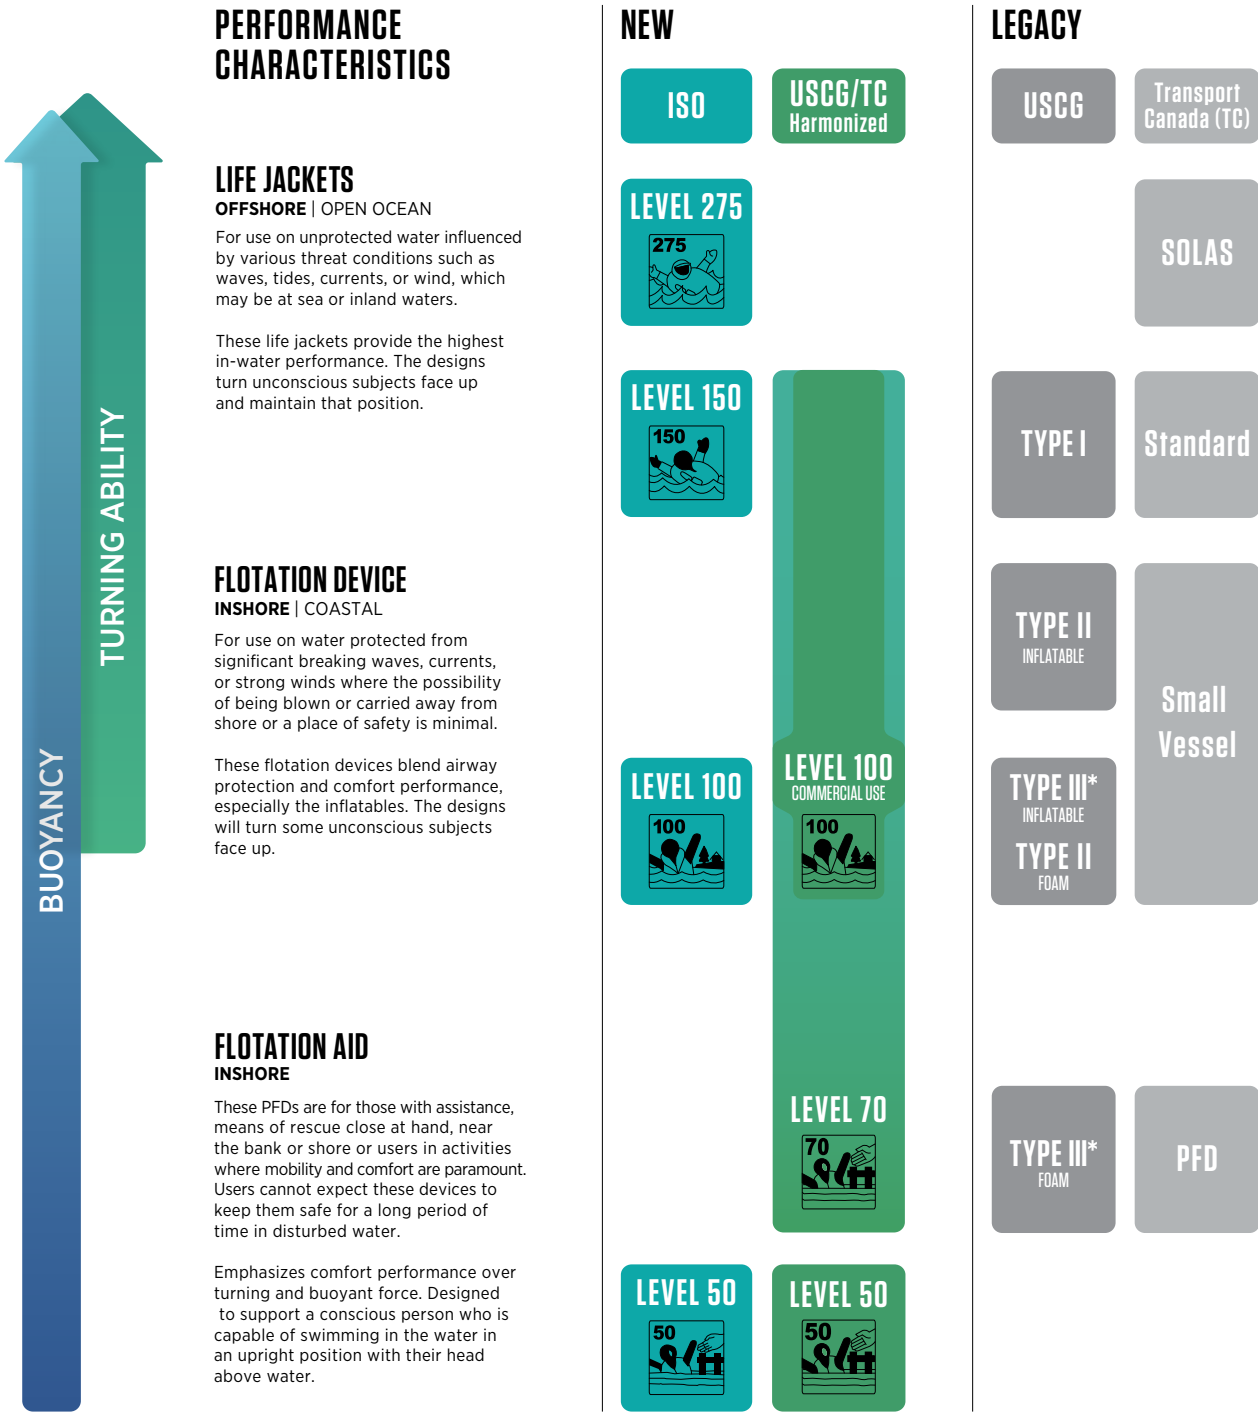

This SUP leash release belt allows for quick disconnection in the event it becomes dangerous to remain tethered to a board.

- SUP Leash Release Belt disconnects paddler from board when needed in unsafe waters
- 1.5" wide web belt with quick-release buckle
- High visibility release makes it easy to find and pull
- SUP leash not included

ADULT PFDS

APPROVAL & PERFORMANCE MAP

IMPORTANT NOTE Previously, PFDs and life jackets in North America were categorized by Type (I, II, III, IV, V) to indicate their performance in different environments, similar to how ISO standards classify them in Europe. Now, the new harmonized TC/USCG standards simplify certification by focusing on minimum buoyancy levels, which also define the legal requirements for boaters. With this change, Mustang Survival is here to help you find the right PFD for your specific activity and environment.

THE MOVE TOWARD PFD STANDARDIZATION

In the mid-2000s, industry leaders, the U.S. Coast Guard, and Transport Canada worked to unify PFD standards across North America. By 2018, outdated classifications were replaced with Level 70, allowing a single approval label in both countries. While other levels were proposed, only Level 70 was adopted.

Key 2025 PFD Regulation Changes

Now, in 2025, the U.S. Coast Guard is introducing another major rule change. Here are the key takeaways:

No New “Type” Approvals

While existing approvals that may refer to “Type” remain valid for legal carriage requirements (i.e., what must be carried on a boat to meet regulations), no new Type classifications will be issued to PFDs entering the market.

Level 50 Accepted

The U.S. Coast Guard will now approve Level 50 devices alongside Level 70. These lower-buoyancy PFDs must be worn to meet legal carriage requirements on a boat.

Level 100 Defined for Commercial Use:

Devices in this category will be approved specifically for commercial applications and are designed to establish an airway-protected position in the water.

What do the New PFD Regulations Mean for Boaters?

Approval does not necessarily mean a device is the best choice for every user. The role of the U.S. Coast Guard and Transport Canada is to ensure devices meet legal requirements, but they do not specify which PFD is best suited for particular activities (kayaking, sailing, fishing, etc.) or environments (coastal, offshore, inshore, etc.). Under the new performance classification system, buoyancy levels in PFDs are no longer tied to a user’s size but reflect skill level, environment, and expected rescue time. While Level 50 (L50) devices focus on mobility and comfort for swimmers, Level 70 (L70) offers a range of buoyancy and in-water support for tougher conditions. However, approval levels only set a minimum performance standard. The actual buoyancy, measured in Newtons, can vary significantly within each level. For example, Mustang’s Elite 190 Inflatable PFD is approved as L70 but provides 188N of buoyancy, surpassing the minimum requirement.

That responsibility to choose the right device falls on manufacturers, retailers, and ultimately, the end user. Boaters should consider their specific needs—such as activity type, water conditions, and personal comfort—when choosing a PFD. While regulations ensure baseline safety, selecting the right device for the right environment is key to staying safe on the water.

DELUXE ANTI-EXPOSURE OVERALL AND FLOTATION SUIT

Model#	MS2195
Approval	TC MARINE - CAN/CGSB 65.11
Size::	S, M, L, XL, XXL, XXXL

This anti-exposure coverall and flotation work suit uses our AirSoft™ foam to create a light, comfortable fit that offers hypothermia protection in the event of accidental immersion (immersed Clo 0.420).

- Mustang AirSoft™ foam for flotation and hypothermia protection
- Immersed Clo value of 0.420
- Inflatable head support pillow for additional buoyancy
- Neoprene wrist closures for weather protection
- Tug-Tite® at thighs and ankles for improved fit
- Ergonomic insulated hood folds into collar
- Two chest pockets and extra large hip pockets
- SOLAS reflective tape enhances visibility

2 ORANGE

CLASSIC FLOTATION SUIT

Model#	MS-185
Approval	TC MARINE - CAN/CGSB 65.11
Size	S, M, L, XL, XXL, XXXL

This flotation suit uses closed-cell foam to provide warmth, comfort, and safety in cold marine environments for sailors, fishermen, and a range of industrial activities.

- Hypothermia and flotation protection in a 1-piece suit
- Immersed Clo 0.420
- Designed for use in a range of industrial and recreational environments
- Tug-Tite® at thighs for improved fit and minimized water flushing
- Velcro™ closures at wrists and ankles for fit and to minimize water flushing
- SOLAS reflective tape for improved visibility
- Insulated hood folds into collar

13 BLACK

INTEGRITY HX FLOTATION SUIT

Model#	MS-195HX
Approval	TC MARINE - CAN/CGSB 65.11
Size	S, M, L, XL, XXL, XXXL

From workers on tugs to watchers of whales, and from ice fishers to Coast Guards, anyone out in the elements can adventure on, even in the most foul conditions.

- Mustang AirSoft™ foam for flotation and hypothermia protection
- Immersed Clo value of 0.420
- Inflatable head support pillow for additional buoyancy
- Neoprene wrist closures for weather protection
- Tug-Tite® at thighs and ankles for improved fit
- Ergonomic insulated hood folds into collar
- Two chest pockets and extra large hip pockets
- SOLAS reflective tape improves visibility

185 RED-CARBON

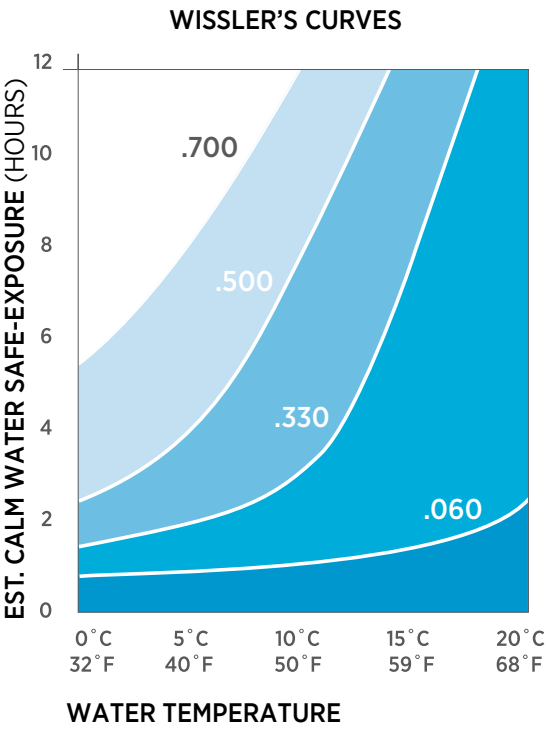

HYPOTHERMIA PROTECTION

Cold water can deprive you of all mental and physical capacities within minutes, leading to hypothermia, unconsciousness, and even death. Our team of engineers has done extensive research to understand cold water survival. How long a person can survive in cold water primarily depends on the water’s temperature, exposure time, and the thermal insulation of the victim’s protective clothing.

SURVIVAL TIMES

This graph indicates random samples of CLO values and the corresponding estimation of survival time in calm water (assuming a 5th percentile male with a 5.5°F [3°C] drop in core temperature).

WHAT IS A “CLO” & WHAT DOES IT MEAN?

“CLO” is a measurement of the thermal insulation of a suit or device. One CLO represents the thermal insulation of an average comfortable resting person wearing business clothing in a room temperature indoor environment. Fractions of this thermal insulation are perceived when worn in the water. Each value is below 1.0 CLO because water transfers heat out of the body nearly 25 times faster than air. CLO values are reduced even more significantly in turbulent water compared to calm water, and test methods have evolved to address various conditions. Wearing a Mustang Survival jacket or suit will exponentially increase cold water survival time.

WHEN IN STILL AIR

PROTECTION	CLO VALUE
Normal Clothing	1.00

WHEN IN CALM WATER

PROTECTION	CLO VALUE
NUDE	0.06
Floater Coat	0.16

MUSTANG SURVIVAL MARINE SPEC

Intentionally developed for the rigors of marine use, Marine Spec is highly abrasion, UV, and saltwater resistant. The three levels of Marine Spec (BP, SP, and MP) have unique characteristics for different environments, exposure, and ocean-based activities. When choosing the Marine Spec fabric, Mustang Survival tested over 70 breathable materials and evaluated 12 different properties, totaling over 800 material tests, before completing real-world field assessments. The conclusion is Marine Spec is the ultimate combination of waterproofness, durability, and breathability.

MARINE SPEC BP

Benchmarked with Mil Spec 6.5 with Gore-Tex, Marine Spec BP, which is 195 gsm features abrasion, salt water, and UV, resistant 70D nylon. Its bi-component membrane, hydrophilic PU membrane, and PFC-free hydrophobic PU coating ensure top breathability, waterproofing, and windproofing. A nylon tricot backer adds next-to-skin comfort.

MARINE SPEC SP

At 180 gsm, Marine Spec SP, lighter and more breathable than Marine Spec BP, features the same abrasion, salt water, and UV-resistant 70D nylon face fabric. Its thinner, breathable bi-component membrane with PFC-free hydrophobic PU coating offers waterproof and windproof protection. The nylon tricot backer safeguards the inner membrane and provides next-to-skin comfort.

MARINE SPEC MP

At 120 gsm, Marine Spec MP is our lightest-weight fabric and most breathable; it also features mechanical stretch. Waterproof and windproof with a 50D nylon face fabric, inner monolithic and hydrophilic PU membranes, and a comfortable nylon tricot backer, this fabric features a laminated peel with modest tear strength and puncture resistance.

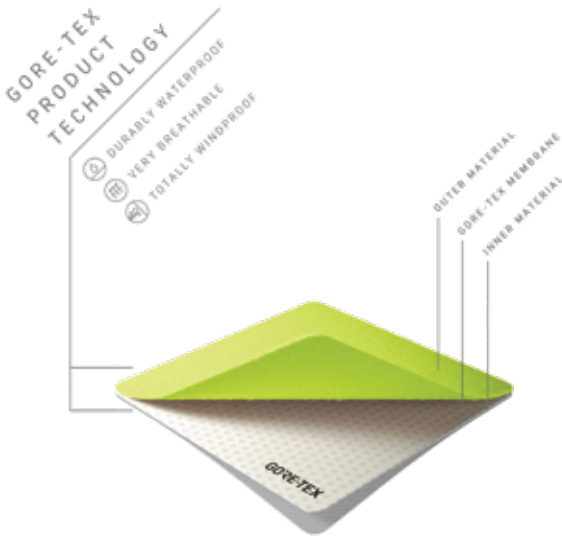

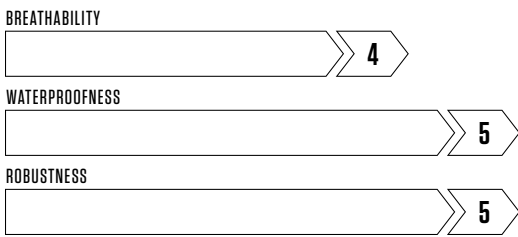

MIL SPEC 6.5 FABRIC WITH GORE-TEX TECHNOLOGY

Mustang Survival has been building leading dry solutions for military, Coast Guard, and water rescue professionals for decades. This expertise, military-grade fabrics, and a focus on maximizing waterproofness, breathability, and durability have allowed us to build the world's driest and toughest performance outerwear.

Until 2017, only the military, Coast Guard, and public safety products used Mil Spec 6.5 fabric with GORE-TEX technology. The fabric has a weight of 220 gsm, a durable 70D nylon face with high abrasion, salt water and UV resistance, and a nylon tricot backer that provides additional robustness and a comfortable next-to-skin feel. With years of validation in the field, it is now available to recreational users who demand the highest level of protection in the harshest marine environments with the EP 6.5 Ocean collection.

Working hand-in-hand with the GORE-TEX brand as manufacturing partners we integrate their technologies into products like our EP 6.5 Ocean Apparel. GORE-TEX tests their fabrics, membrane, insulations, and linings to meet their high quality standards before we begin our design and testing processes in the Waterlife Studio.

BLUESIGN®/ OEKO-TEX

These certifications indicate Mustang Survival products use approved chemicals, are made sustainably, support socially responsible textile practices, and have a reduced impact on people and the environment.

DRY SUIT CONSTRUCTION

DRY SUITS

Dry suits provide essential protection on the water. With designs that allow unrestricted movement, advanced materials, and decades of R&D, comfort and quality are guaranteed.

MUSTANG SURVIVAL DRY SUIT EXPERTS

With decades of expertise in public safety, commercial, and military dry suits—and Canadian-based production facilities—Mustang Survival has built a reputation for trust and innovation. Building on this foundation, the Quadra, Helix and Hudson dry suits have quickly become favourites for recreational and competitive stand-up paddleboarding, kayaking, angling, and sailing.

As more and more people discover the thrill of marine adventure, Mustang Survival continues to lead with high-performance protection for every level of exploration.

WHY A MUSTANG SURVIVAL DRY SUIT?

CRAFTSMANSHIP

Precision, patience, and purpose in every dry suit. Built to last, our dry suits reflect a legacy of innovation and set the standard for durability and performance.

TESTED

Every dry suit undergoes extensive leak-proof testing. From seams to material and new features, each component is rigorously assessed through in-house tests and real-world trials to meet the highest waterproof standards.

TRUSTED

Backed by decades of expertise and trusted by professionals, our dry suits combine superior quality and proven cold-water protection. Designed to perform when it matters most, they set the standard for reliability and safety.

EP 6.5 OCEAN COLLECTION

The EP 6.5 Ocean Collection is specifically designed with extreme marine environments in mind. This design purpose coupled with our obsessive ingenuity enables sailors to venture into the wildest seas anywhere in the world with maximum protection, optimal performance, and unparalleled confidence.

13 BLACK

EP 6.5 OCEAN RACING JACKET

Model#	MJ6512	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MIL SPEC 6.5 GORE-TEX®

- Mil Spec 6.5 GORE-TEX® and a YKK® AQUASEAL® zipper ensure this EP jacket keeps you dry when weather conditions deteriorate and seas get rough.
- 500D Cordura® reinforced elbows and forearms increase abrasion resistance
 - 2-way YKK® AQUASEAL® waterproof zipper minimizes bulk and keeps you dry
 - Cohesive™ bottom cinch creates a customized fit
 - Removable high-visibility hood minimizes bulk at the collar and uses clear windows to maximize peripheral views
 - Neoprene wrist cuffs with over cuff adjust to seal out water
 - Two large dump pockets store essential gear, a sleeve pocket stores smaller items, and zippered fleece-lined pockets warm hands

13 BLACK

EP 6.5 OCEAN RACING DRY TOP

Model#	MJ6522	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MIL SPEC 6.5 GORE-TEX®

- This dry top uses durable, breathable, and waterproof Mil Spec 6.5 GORE-TEX®, added length, and watertight latex neck and wrist seals to provide maximum protection when conditions are at their worst.
- 500D Cordura® reinforced elbows increase abrasion resistance
 - Latex neck and wrist seals provide maximum protection against water ingress
 - Removable high-visibility hood with windows and collar system offers extra protection when needed
 - The large chest pocket, and small sleeve pocket provide ample space to store critical gear
 - Internal neoprene waist seal protects against water ingress in heavy seas and spray
 - SOLAS reflectivity on shoulders increases visibility in low light conditions

OFFSHORE OUTERWEAR

Engineered for life beyond the coastline, offshore outerwear provides essential protection against relentless rain, waves, and spray. Built to endure salt, wind, and the harshest marine environments, these designs offer durability without compromising mobility—ensuring unrestricted movement for active tasks on deck.

COASTAL OUTERWEAR

Coastal outerwear provides dependable protection from wind, rain, and sea spray while ensuring comfort and ease of movement. Ideal for shorter journeys and changing conditions, it keeps wearers dry and focused on the water.

MERIS WATERPROOF JACKET

Model#	MJ3511	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MARINE SPEC BP (PFAS FREE)

Designed and built for outstanding performance in challenging marine conditions, our Meris Jacket is redesigned for improved comfort and mobility. Crafted with durable 3-layer PFAS-Free Marine Spec BP fabric, featuring a 100% waterproof YKK Aquaseal zipper and an adjustable neoprene cuff system, this jacket offers superior protection in offshore environments.

- Packable hood design with clear peripheral-view windows
- Hood includes stowable face guard
- Neoprene inner lapping cuff system significantly decreases water ingress
- 100% waterproof YKK® AQUASEAL® zipper eliminates the requirement for storm flaps, enabling reduced weight and bulk
- Zippered and fleece-lined hand warmer pockets
- Low-profile dump pockets keep bulk out of the way
- Reflective elements improve low-light visibility

MERIS WATERPROOF SALOPETTE

Model#	MP3501	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MARINE SPEC BP (PFAS FREE)

Our redesigned Meris Salopette delivers steadfast protection and performance in offshore environments. Crafted with breathable, waterproof PFAS-Free Marine Spec BP fabric, reinforced with 500D Cordura®, and featuring adjustable elements to customize the fit, it's perfect for challenging offshore conditions.

- Two-way center front waterproof YKK® AQUASEAL® zipper reduces bulk and weight
- Lightweight removable knee pads
- Knee and waist adjustments customize fit
- Large range of hem adjustments to accommodate different footwear
- Zippered chest pocket and two dump pockets
- Double thigh pockets feature a clear window section for notes, and a tool tie-in point

REDESIGNED

MEN'S TAKU WATERPOOF JACKET

Model#	MJ130002	Size	S, M, L, XL, XXL, 3XL
Fit	REGULAR	Material	MARINE SPEC SP (PFAS FREE)

Whether fishing or sailing, this PFAS-free jacket offers lightweight, waterproof protection against foul weather. Designed for performance, it features neoprene inner cuffs, a stowable hood, and tool tie-ins for easy gear access.

- YKK Aquaguard® centre front zipper
- Stowable hood
- Adjustable inner neoprene wrist seals
- Extended inner wrist seal integrates with gloves
- Zippered hand warmer pockets
- Large chest pocket
- Internal elasticized gathered hem
- Zippered underarm venting
- Marine Loop attaches to engine cut-off switch

REDESIGNED

MEN'S TAKU WATERPROOF BIB PANT

Model#	MP1300	Size	S, M, L, XL, XXL, 3XL
Fit	REGULAR	Material	MARINE SPEC SP (PFAS FREE)

The redesigned PFAS-free Men's Taku Waterproof Bib delivers superior waterproof, windproof, and lightweight performance, offering durability against abrasion, saltwater, and UV rays. Tested by both professional and recreational anglers for high performance in inshore and coastal marine conditions.

- Handwarmer chest pockets
- Thigh dump pocket w/ tool tie
- Two-way YKK Aquaguard® entry zipper
- Waist belt loops (belt not included)
- Removable knee pads
- Behind-the-knee adjustment tabs
- Large range of hem adjustments to accommodate different footwear
- Seat, knees, and hem reinforced with 500D Cordura

INSHORE OUTERWEAR

Coastal outerwear provides dependable protection from wind, rain, and sea spray while ensuring comfort and ease of movement. Ideal for shorter journeys and changing conditions, it keeps wearers dry and focused on the water.

- Foam panel helps the hat float

RECREATIONAL PRODUCT FIT GUIDE

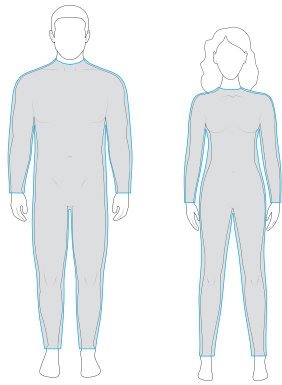

Our apparel and gear are designed with a specific fit for intended activities and your safety. This guide is a resource that will help you find the perfect fit to best complement your waterlife adventures and enhance performance.

BASE LAYER FIT

Our closest-to-body fit. Base Layer Fit can be layered under most mid-layers and all our technical shells.

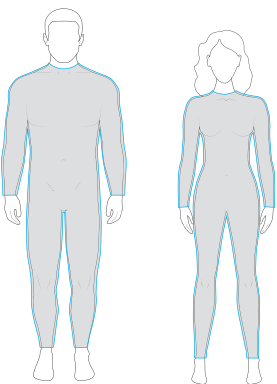

- Slimmest Cut
- Fits under mid and outer layers

REGULAR FIT

Our classic fit has a comfortable cut throughout. Regular Fit technical shells can be worn over most mid-layers.

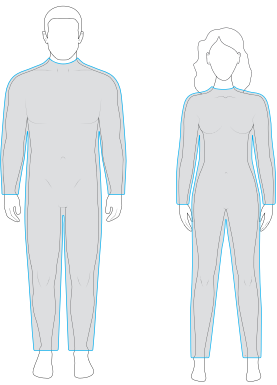

- Comfortable Cut
- Fits over most mid-layers

TRIM FIT

Our slimmer-than-regular-fit offers a low-profile cut with tailored shoulders. Trim Fit technical shells can be worn over a first layer and lighter-weight mid-layers.

- Low-Profile, Tailored Cut
- Fits over first layers and lighter-weight mid-layers

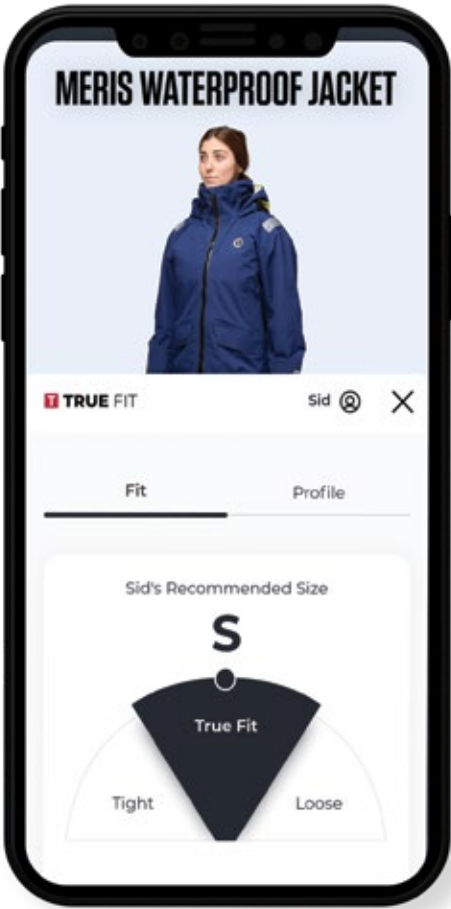

RELAXED FIT

Our most generous fit. Relaxed Fit technical shells can be worn over the heaviest weight mid-layers.

- Most Generous Cut
- Fits over the heaviest weight mid-layers
- Dry suits cut to provide extra torso length enabling easier donning and doffing

FIT GUIDE

With True Fit, you can select Mustang Survival gear with confidence, knowing you’re choosing the right size for peak performance and comfort. Check it out on MustangSurvival.com.

EXTENDED SIZING INFO

Designed and fitted as fully integrated systems, we create our two-piece outerwear lines as head-to-toe waterproof solutions. These collections act as the final piece of protection in your layering system. Carefully patterned by our in-house experts, the fully articulated garments—in regular and relaxed fit—ensure complete, unencumbered movement. The strategically placed seams increase garment durability, and our rigorous field testing assures all-day comfort.

We’ve created extended sizing for our EP and Meris collections to make these popular options accessible to more users, including women. Additional features like adjustable hems, cuffs, shoulder straps, and waists help to customize the fit further to accommodate wearers of different body types and genders. When you need it most, this carefully considered outerwear provides the best against the elements.

SUSTAINABILITY

GOAL: REDUCE MUSTANG SURVIVAL’S OVERALL ENVIRONMENTAL IMPACT

This goal remains as true today as it will continue to be tomorrow—it is an ongoing effort and area of importance for the organization. Our current focus is choosing and developing fabrics and materials with lower environmental impacts.

THIS INCLUDES

PFAS-Free Materials and Treatments

We are actively working to find alternatives and remove PFAS from all our products. By 2025, we will have eliminated them from our kids and youth flotation. By 2027, they will be removed from our recreational apparel line.

Utilizing bluesign® and OEKO-TEX® certified materials

These certifications indicate a product uses approved chemicals, is made sustainably, supports socially responsible textile practices, and has a reduced impact on people and the environment. For new product designs we seek out materials that meet these high standards.

Using only PVC-free foam in our foam PFDs

We’ve already replaced all PVC-based foam in our recreational lineup with Gaia™ foam or other PVC-free foam. Gaia™ foam is free from PVCs, CFCs, phthalates, and halogens, yet still provides strong buoyancy and in-water performance.

As we work on improving the impact of our products, we’re also taking a bigger-picture and multi-faceted approach to ensure we continue to be part of the solution.

WARRANTY + REPAIRS

Mustang Survival proudly guarantees the quality and performance of all our products. All Mustang Survival products come with a warranty that reflects our confidence in the high quality of our design, engineering, and manufacturing.

WARRANTY PERIODS

Practical Product Lifetime

- Outerwear

2 years from date of purchase

- Kids foam flotation
- Inflatable flotation
- Dry suits

1 year from date of purchase

- Adult foam flotation
- All other products

What our warranty covers

Products with defects in materials or workmanship will be replaced or repaired at the discretion of Mustang Survival for the defined warranty period of the product.

The warranty excludes products damaged due to normal wear and tear, unauthorized modifications, embellishments or alterations, improper use, improper maintenance, accident, misuse, negligence, damage, or if the product is used for a purpose for which it was not designed, or used not in accordance with the product instruction.

Unauthorized product modification automatically voids the Mustang Survival

warranty. Damage due to wear and tear may be repaired at a reasonable charge.

Mustang Survival will use reasonable discretion to determine the validity of warranty claims. Each situation is different and is up to the discretion of Mustang Survival to determine whether a product has a manufacturing defect or if it is suffering wear and tear.

In the case that a product does have a manufacturing defect deemed by Mustang Survival and is repairable, Mustang Survival may choose to not replace but to repair the product free of charge. The decision on whether to repair or replace a product is solely up to the discretion of Mustang Survival.

The warranty applies to the original purchaser only and proof of purchase is required. Mustang Survival products purchased from unauthorized retailers, online auction sites, or as second hand items are not covered under warranty.

The only obligation or liability of Mustang Survival under this limited warranty is to

repair or replace the product and Mustang Survival shall not, under any circumstances be liable for loss of use or any consequential damages sustained by the Customer.

All other warranties expressed or implied, and remedies with respect to the condition or use of the product, which might otherwise be provided by law in any jurisdiction, are specifically excluded.

This warranty applies to commercial, recreation and industrial products.

Note: A recreational product used in a commercial/industrial environment will only be covered for 1 year against defects in materials or workmanship.

The warranty for products supplied under government contracts depends solely on the warranty agreed to as part of that contract.

WHAT DOES PRACTICAL PRODUCT LIFETIME MEAN?

Practical Product Lifespan will be determined in the reasonable discretion of a Customer Service representative who shall take into account at least the following factors: the type and nature of the product, the nature of the use of the product, nature of the product issue involved, and age of the product.
